

GOAL KICKSTART

2025 performance review - exceptional equity performance but less US exceptionalism

2026 has started relatively pro-risk after a few weaker days for risky assets at the end of 2025. The weekend was dominated by the US deposing of President Maduro, but market impacts have been limited so far - our oil team sees modest short-term upside risk in case of supply disruptions and medium-term downside in case of rising production until 2030. Key macro data this week are Euro Area Core HICP and final PMIs and the US employment data, including JOLTS, the unemployment rate (GS 4.5%, consensus 4.5%, last 4.6%) and US nonfarm payrolls, where we are above consensus (GS: 70.0k, consensus: 59.0k, last: 64.0k).

2025 turned out to be another 'risk on' year with strong returns for equities and risky assets more broadly - a US 60/40 portfolio delivered nearly the same return as in 2024 with less drag from US 10-year bonds (Exhibit 1). Silver and Gold ended near the top of the leaderboard - copper also rallied after relatively poor performance in 2024. Also, European banks delivered an exceptional 75% return following an already strong 2024 performance. Regional leadership changed with EM/Asia assets performing strongly and US assets being less exceptional, also with the Dollar weakening. In fact, the S&P 500 had a similar return as the STOXX 600 (in local currency) but underperformed for most

non-US investors - the Magnificent 7 outperformed the market but by a much smaller margin compared to 2024 and with much larger dispersion between individual stocks. The same has been true with bitcoin (BTC), which ended the year down 10% after 2024's 123% rally. S&P GSCI Energy was also one of the few areas that posted a negative return in 2025 in a reversal from 2024. Of course, 2025 was a tale of two halves with performance into and immediately after 'Liberation day' on April 2nd being broadly 'risk off' and a strong recovery afterwards (Exhibit 2) - it turned out to be a material 'buy the dip' opportunity for US assets with the Magnificent 7, Nasdaq and US banks moving near the top of the leaderboard. Only the Dollar, Bitcoin and S&P Energy have not fully recovered from the declines since then.

We maintain a modestly pro-risk stance in our asset allocation into 2026 (for 3m and 12m: OW equities, N bonds/commodities/cash, UW credit) and focus on diversification opportunities and hedges to protect our equity OW. Our global macro outlook for 2026 remains friendly with sturdy global growth (2.8% versus consensus at 2.5%), helped by more policy easing and falling inflation - this should create a friendly backdrop for risky assets. Having said that, with elevated valuations, in our baseline

outlook risk-adjusted equity returns are likely to be lower, and we expect performance to broaden out. *We wish all of our readers a healthy, happy, and prosperous 2026.*
