

January 21, 2026 09:05 PM GMT

Amazon.com Inc | North America

Is Fresh and Perishable Inflecting?

3P data say yes, with fresh/perishable spend on AMZN more than doubling vs. single digit growth in early '25 – a positive signal that AMZN's expansion is yielding. Faster grocery growth (~20% of NA GMV) is a source of revision/mult upside. OW, \$315PT. We also detail read-across to other grocers.

3P Data Says AMZN's Fresh and Perishable Business Is More than Doubling Y/Y: In [Amazon.com Inc: Grocery Expansion and Fee Change: What It Means and Reads for WMT and Food Retailers](#) and [Amazon.com Inc: Unlocking the \\$600bn Fresh Opportunity...Profitably](#) we detailed how the recent (August 2025) fresh/perishable expansion efforts by AMZN could drive more durable N. American GMV growth (**every 1% share of fresh/perishable is ~1% upside to our '26 base case NA GMV**) and how (we believe) AMZN can deliver fresh/perishable profitably.

While third-party data are never perfect...directionality can matter...and in this case we observe encouraging directional trends from Numerator. As shown in [Exhibit 1](#), rolling **sales growth in meat and produce at AMZN** (per data provider tracking) **has accelerated to as high as 186% Y/Y growth** (week of 10/26/25) **over the last 6 months of 2025**. This is up from an average growth rate of 9% Y/Y growth from 1Q:25-2Q:25. Notably too, the **acceleration seems to be broad-based and across income cohorts**, with lower, middle, and higher income households all reporting accelerating their fresh/perishable spend on AMZN. While we acknowledge the small base of fresh/perishable is playing a role in this level of acceleration...these data (combined with AMZN's ability to drive repeat behaviors) are an encouraging signal of a larger business to come.

Exhibit 1: 3P data show AMZN's meat and produce sales growth has accelerated to as high as 186% y/y, up from single digit growth earlier in '25...

Exhibit 2: ...With acceleration broad-based across low, middle, and high income cohorts:

Source: Numerator, Company Data, Morgan Stanley Research, Note: Rolling 13 weeks refers to the 13-week period of sales leading up to each week noted in the chart above.

With Faster Fresh/Perishable Leading to Faster Overall AMZN Grocery Spend

Too: The faster growth in fresh/perishable is leading to faster overall grocery/CPG spend on AMZN as well...which seems to have accelerated to 35%+ growth, from low double digit growth earlier in the year. This **directionality speaks to potential upside to N. American GMV growth in 4Q/'26**, as we estimate grocery/CPG makes up ~20% of total N. American GMV and we model it to decelerate to 15% y/y growth in '26, from 17% y/y in '25. The extent to which AMZN can deliver faster N. American GMV growth from grocery would likely lead to revisions and multiple expansion (as the market would be more confident in multi-year growth). We remain OW AMZN, with a \$315 PT (as our Top Pick).

Exhibit 3: AMZN's total grocery/CPG business also seems to be accelerating driven by meat and produce acceleration...as sales appear to have accelerated to 35%+ growth, from 10%+ growth earlier in the year.

Source: Numerator, Company Data, Morgan Stanley Research, Rolling 13 weeks refers to the 13-week period of sales leading up to each week noted in the chart above.

What is the competitive read-across to WMT, traditional grocers, club stores,

DASH, CART and UBER? On one hand, the addressable market is very large (\$1.7T of total offline grocery/CPG spend to capture)...so we do not see these data as an immediate negative read to growth or trends. That said, they are an indication of rising online grocery competition ahead as AMZN bundles groceries into its existing platform and its user profile data improve. We see this improving data set combined with AMZN's leading first party inventory and leading logistics **giving AMZN an advantage in building out a next generation agentic grocery offering** (see [Internet: Agentic Shoppers Are Coming... Who Could Win or Lose?](#))....which will drive even more durable multi year growth.

Digging into the data further, we note that since AMZN's announcement to expand fresh/perishables access **the company has been primarily taking market share in meat & produce from Traditional Grocers**. Publix, ACI, and KR have seen growth slow to flat/+LSD% projected sales growth while Ahold Delhaize (*covered by Izabel Dobrev*) remains steady and Aldi accelerated to mid-teens in December. **Club Stores show no clear negative impact:** Sam's Club growth remains stable at ~1%, BJ's has decelerated modestly (mainly due to lapping its Fresh 2.0 rollout), and COST strengthened by +8pts from August to December. **WMT is seeing little change in underlying trends**, improving slightly from -2% y/y in June to flat y/y in December, although AMZN's growing scale may still be creating competitive pressure that could require reinvestment.

OVERWEIGHT THESIS

- Amazon's high-margin businesses continue to allow Amazon to drive greater profitability while still continuing to invest (last mile delivery, fulfillment, Prime Now, Fresh, Prime digital content, Alexa/Echo, India, AWS, etc).
- Amazon Prime membership growth drives recurring revenue and positive mix shift.
- Cloud adoption hitting an inflection point.
- Advertising serves as a key area for both further growth potential and profitability flow-through.

Risk Reward – Kroger Co. (KR.N)

Mixed Food at Home Outlook and Balanced Risk/Reward Skew

PRICE TARGET \$67.00

PT of \$67 based on ~12x our '27e EPS of ~\$5.45 (or ~6x '27e EBITDA of ~\$8.5b). Valuation reflects increasing headwinds in '26/'27 between disinflation, pharmacy deceleration, and heightened competition, though this is partially offset by alternative profit growth.

Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. View explanation of Options Probabilities methodology [here](#)

EQUAL-WEIGHT THESIS

- KR is one of the largest conventional food retailers, with competitive advantages including leading scale, an advanced customer data science platform & ramping digital capabilities.
- Near term headwinds are rising including Food at Home disinflation, pharmacy pressure from IRA and GLP, and tepid unit trends. This is partially offset by growth in alternative profit streams.
- We model EBIT margins normalizing around ~3.3% in '27 & beyond (above the 2.4% pre-COVID level but below the 3.4% peak) behind a rational competitive backdrop, though pricing pressures and e-comm dilution are risk factors which likely prevent EBIT margin expansion.

Consensus Rating Distribution

Risk Reward Themes

Disruption: *Negative*
Pricing Power: *Negative*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE

\$90.00

~14x our 2027e EPS of ~\$6.62

Food at Home reaccelerates coupled with successful execution of the alternative profit model. EBIT margin and valuation benefit from retail media, share gains, and e-commerce profitability improvements. ID sales of +3.3%/+3.5%/+4% with ~9%/+17.5%/+15% EPS growth in '25/'26/'27 (buoyed by share buybacks). L-T IDs of +3.5%-4% with moderate annual EBIT margin expansion (~5 bps), MSD EBIT & MSD/HSD EPS growth. Multiple modestly above L-T avg.

BASE CASE

\$67.00

~12x our 2027e EPS of ~\$5.45

KR remains a leading conventional operator, but macro uncertainty remains a risk. We model +2.9%/+2%/+2.5% IDs in '25/'26/'27 with +6.5%/+9%/+4.5% EPS growth (supported by a ~\$5b ASR and ~\$2.5b in buybacks). Longer-term, the industry faces accelerating margin pressure from discounters and increased online penetration, which we expect to hold at double digits post COVID vs ~3.5% pre COVID. IDs of +2.5% long-term with LSD/MSD EBIT/EPS growth.

BEAR CASE

\$34.00

~9.5x our 2027e EPS of ~\$3.49

Significant disinflation, share loss, and pharmacy pressure drives deceleration in IDs as profitability is hindered by sales weakness and rising competition. L-T, difficult industry conditions dampen KR's ability to grow IDs & invest, driven by a promotional pricing environment & online competition. IDs of +2.5%/+0%/+1% in '25/'26/'27 with persistent consumer weakness. EBIT margins of 3.1%/2.6%/2.4% in 25/'26/'27. Bear case multiple near trough.

Risk Reward – Kroger Co. (KR.N)

Risk Reward – Albertsons Companies, Inc (ACI.N)

Underweight on Share Loss, Pharmacy Pressure, and Disinflation

PRICE TARGET \$14.00

Our \$14 price target is based on ~4.5x our '27e MS adj. EBITDA of ~\$3.75b, implying a ~25% discount to KR. This discount is in-line with ACI's historical range and is warranted in our view given lackluster market share trends, greater margin headwinds, and a longer reinvestment period.

Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 20 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

BULL CASE

\$24.00

~5x '27e MS adj. EBITDA of ~\$4.1b, or ~9x P/E

IDs of +2.7%/+2.8%/+3.2% in '25/'26/'27, as ACI begins to regain market share. Post '27, IDs of ~3.2%, above industry as ACI's scale & sales-driving initiatives accelerate. EBITDA margins contract ~35 bps in '25, expand by ~20 bps in '26 and are ~flat in '27. L-T EBITDA/EPs grows MSD%/LDD%. Multiple at 15% discount to KR, above the L-T average.

BASE CASE

\$14.00

~4.5x '27e MS adj. EBITDA of ~\$3.75b, ~6.5x P/E

IDs of +2.4%/+1.3%/+1.7% in '25/'26/'27, as disinflation, share loss, and pharmacy pressure top-line growth. Post '27, IDs of ~1.7%, modestly below industry as ACI's struggles to compete in an increasingly competitive market. EBITDA margins contract ~40 bps/~10bps/~0bps in '25/'26/'27 as productivity initiatives are offset by reinvestment needs as industry faces margin pressure. L-T EBITDA/EPs grows LSD%/MSD%. Multiple at ~25% discount to KR, in-line with L-T average.

BEAR CASE

\$8.00

~4.0x '27e MS adj. EBITDA of ~\$3.25b, or ~7x P/E

IDs of +1.9%/-0.7%/-0.3% in '25/'26/'27 as share loss accelerates. L-T, IDs slightly decline as ACI cedes share behind a challenged position in the industry. Gross margin contracts of ~55 bps/~15 bps/~10 bps in '25/'26/'27 driven by pharmacy, shrink, and growing eComm penetration. EBITDA margins contract ~45 bps/~25 bps/~15 bps in '25/'26/'27 as ACI struggles to generate leverage on ID sales. Bear case multiple at ~40% discount to KR.

UNDERWEIGHT THESIS

- Grocery wars are intensifying with price investments, ecommerce partnerships, and promotional activity increasing pressure.
- Downside based on ID headwinds from pharmacy (IRA and GLP), Food at Home disinflation, and weak unit trends, as well as margin pressure from an increasingly competitive backdrop.
- Upside risks include better than expected industry trends in '26 coupled with retail media benefits flowing through on an accelerated timeline.
- L-T we model share loss (~1.7% IDs), flattish margins & LSD/MSD% EPS growth.

Consensus Rating Distribution

Risk Reward – Walmart Inc (WMT.O)

Flywheel In Motion Supports Structural Earnings Growth

PRICE TARGET \$135.00

Our price target represents a ~43.9x blended P/E multiple on our F28e EPS of \$3.08, or a ~21x EV/EBITDA multiple against our F28e EBITDA of ~\$51.1b. A P/E of 43.9x is above WMT's 10-year average historical of 21x, which we believe is warranted because the company has transformed from a brick-and-mortar retailer being disenfranchised by AMZN to an eCommerce and supply chain disruptor.

Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 16 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

- We expect WMT's earnings momentum seen in F'24 and F'25 to continue through F'26 and beyond as the eCommerce, Membership and Advertising Flywheel drives upside
- We see WMT balancing longer-term investments with near-term returns. We expect WMT to deliver +MSD% sales growth and +MSD to +HSD% EBIT growth over the next few years driven by share gains, eCommerce profit improvements, and high margin alternative revenue growth.
- Our OW rating and SOTP-based \$125 PT are underpinned by a preference for 1) quality players with scale and 2) defensive retailers. We believe there is room for further valuation expansion if WMT continues executing its eCommerce flywheel

Risk Reward – Costco Wholesale Corp (COST.O)

Excellent Fundamentals Justify Elevated Valuation

PRICE TARGET \$1,130.00

PT derived using a historical & relative P/E and EV/EBITDA multiple framework with further DCF support. Our \$1,130 PT is based on ~48.4x our calendarized 2027e EPS of ~\$23.33 and equates to a ~29.6x EBITDA multiple. Both multiples are near historic highs and imply LT annual comp/EBIT growth of ~6%/~10%. We think this is achievable as COST offers defensive, durable growth & best-in class fundamentals on a consistent basis.

Consensus Price Target Distribution

Mean Morgan Stanley Estimates

OVERWEIGHT THESIS

- COST's results have consistently been among the best in Retail. Over the past decade, COST has delivered ~6% comps and ~10% EBIT growth on average.
- It is rare to find a business with COST's solid comp/membership growth, while relative e-commerce insulation differentiates its value proposition from other retailers.
- We are Overweight even as the stock trades at an elevated valuation given COST's scarcity value, safety, and scale.

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 20 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

Consensus Rating Distribution

Risk Reward Themes

- Pricing Power: Positive
- Secular Growth: Positive

View descriptions of Risk Rewards Themes [here](#)

BULL CASE \$1,300.00

~51.6x C'27e EPS of ~\$25.20, or ~31.8x EV/EBITDA

U.S. ex-fuel comps of +8.1%/+9.0%/+7.3% in F'26/F'27/F'28, above historical trends despite tough laps/uncertain macro as Grocery strength persists with discretionary stabilization. EBIT margin expansion of ~20 bps/~20 bps/~5 bps in F'26/F'27/F'28, which produces ~16%/~17%/~11% EBIT growth. ~51.6x P/E equates to ~31.8x EV/EBITDA, above peak, reflecting a return to peak EPS & membership growth despite challenging laps driven by customer retention & best-in-class execution.

BASE CASE \$1,130.00

~48.4x C'27e EPS of ~\$23.33, or ~29.6x EV/EBITDA

US ex-fuel comps of +6.2%/+6.5%/+6.8% in F'26/F'27/F'28. ~10 bps of EBIT margin expansion in F'26 despite wage investments, with ~10 bps/~9bps of expansion in F'27/F'28; EBIT margins reach ~3.88%/~3.98%/~4.07% in F'26/F'27/F'28, with EBIT growth of ~12%/~12%/~11%. Valuation at/near historic peaks and at ~2.1x market multiple, reflecting better relative outperformance to historic trends & much of Retail and stronger EPS power than much of Retail.

BEAR CASE \$750.00

~36x C'27e EPS of ~\$20.91, or ~21.5x EV/EBITDA

US ex-fuel comps slow to ~5.0%/~5.0%/~5.8% in F'26/F'27/F'28 as discretionary & consumables trends normalize in a macro/spending slowdown off tough compares. EBIT margins remain flat in F'26/F'27, before contracting ~25bps in F'28, which results in +8%/+7%/+1% EBIT growth, settling below COST's typical growth algo. Target multiples seem appropriate as they are closer to COST's L-T averages given lower earnings growth vs. historic high-single-digit % average & weaker flow through.

Risk Reward – Costco Wholesale Corp (COST.O)

KEY EARNINGS INPUTS

Drivers	2025	2026e	2027e	2028e
Comp ex. Gas & FX (%)	7.6	6.3	6.6	6.8
Total sq footage growth (%)	2.6	3.0	3.2	3.1
Membership change y/y (%)	3.6	4.0	4.1	4.1
Gross Margin on net sales (%)	11.1	11.2	11.3	11.4
EBIT Margin on total sales (%)	3.8	3.9	4.0	4.1

INVESTMENT DRIVERS

- Top-line growth: continued mid- to high-single-digit comps across all store vintages, driven by COST's leading value proposition
- Mid- to high-single-digit-earnings growth

GLOBAL REVENUE EXPOSURE

MS ALPHA MODELS

3/5 BEST	24 Month Horizon	5/5 MOST	3 Month Horizon
---------------------	-----------------------------	---------------------	----------------------------

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Quintile

RISKS TO PT/RATING

RISKS TO UPSIDE

- US comps (ex. gas/FX) accelerate beyond the 9-10%+ range driven by market share gains
- Membership growth accelerates
- Sustainable gross/EBIT margin expansion

RISKS TO DOWNSIDE

- US comps (ex. gas/FX) decelerate, driven by discretionary weakness as the consumer downturn worsens
- Membership growth slows
- Margin pressures intensify from dilutive mix/channel shift

OWNERSHIP POSITIONING

Inst. Owners, % Active	45.8%	
HF Sector Long/Short Ratio	1.1x	
HF Sector Net Exposure	0.4%	

Refinitiv; MSPB Content. Includes certain hedge fund exposures held with MSPB. Information may be inconsistent with or may not reflect broader market trends. Long/Short Ratio = Long Exposure / Short exposure. Sector % of Total Net Exposure = (For a particular sector: Long Exposure - Short Exposure) / (Across all sectors: Long Exposure - Short Exposure).

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of December 31, 2025)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1519	41%	415	48%	27%	674	42%
Equal-weight/Hold	1583	43%	362	42%	23%	720	45%
Not-Rated/Hold	4	0%	1	0%	25%	1	0%
Underweight/Sell	564	15%	87	10%	15%	216	13%
Total	3,670		865			1611	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below. Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.
