NVIDIA Corp. | North America

NVDA: FAQs on what it will take for the stock to outperform

NVIDIA's recent underperformance has happened while near-term expectations remain high, which is different; while there is a wall of worry to climb, we think a strong Vera Rubin ramp will mitigate any share concerns, and expect to see outperformance from here.

Key Takeaways

- Our checks remain very strong, and getting stronger, though strong near term #s are consensus; so why has the stock lagged?
- Part of this is that the number of AI beneficiaries are broadening out, as the AI builds cause shortages of nearly everything
- There is also concern over potential share, which is overblown to begin with - and Vera Rubin should provide strong demonstration of NVIDIA's leadership
- Part of the concern is the financing of frontier model developers, and NVIDIA's role in that, which requires some adjustment
- The bottom line is that we see the stock outperforming from here as they address these concerns in what continues to be a very robust AI environment.

We have been somewhat surprised at Nvidia's underperformance YTD after a weak close to 2025, and one of our biggest FAQ's so far this year has been on what the cause of that underperformance is, and how those overhangs in be resolved positively or negatively in 2026.

What's different about this is that in prior periods of underperformance in this strong 3 year AI trend there were more near term fundamental concerns which were easier to dispute - lead times coming down in 2024 as other bottlenecks emerged, concerns around DeepSeek, narratives that inventory was overbuilding at the rack ODMs, all of which proved to be secondary to the ongoing ramp.

We hear much less of those concerns at this point, as most investors are bullish about the ongoing ramp; we hear references to \$9+ in earnings power this year, vs. consensus \$7.75, so prospects for near term upside vs. consensus - which does seem highly likely - also seem well understood.

We would generally sum up nearer term share price dynamics around 1) financing concerns at customers - and NVIDIA's role in that financing, 2) competitive dynamics vs. ASICs and AMD, and 3) a broader list of AI beneficiaries as AI starts to challenge the entire semiconductor ecosystem.

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

Looking at those in turn:

1) Customer financing risk: OpenAI linked equities outside of semis (MSFT, SFTBY, CRWV, ORCL) have all underperformed by wide margins due to concerns around funding and OpenAI competitive headwinds. In our conversations with investors, there are questions about OpenAI's spending ambitions, leading to a discounting of Nvidia's prospects with customers most linked to their infrastructure plans.

Exhibit 1: Trailing three month price performance for OpenAI linked equities, all have underperformed

Source: Factset, Morgan Stanley

In the case of Oracle, Keith Weiss now models EPS 50% below the company's FY30 EPS guidance from just 3 months ago ([Oracle Corporation: Big Opportunity, Little Room for Error](#)) as a result of incremental interest expense and lease liabilities required to support the \$356bn in IT capex needed to service its \$523 RPO balance (with a majority of that related to OpenAI). Oracle is a material customer for NVDA and if investors are skeptical on their ability to execute to their backlog, and OpenAI's ability to pay for it, Nvidia will see that reflected in its valuation.

And while compute ROI has been a central concern, there is a focus on competitive trends among foundation model competitors in recent months, especially in the enterprise, as we have seen rotation between Open AI, Google, and Anthropic in competitive benchmarks.

But there's an important consideration: When we hear multi-year spending plans that are 2-3x higher than consensus from a few months ago, those numbers do directionally point to upside even if they don't fully pan out. The directional ramifications of a much more ambitious spending trajectory points to an ongoing growth dynamic, even if some of the numbers seem overly ambitious.

To put it a different way, the most ambitious versions of customer spending plans frame the bull case, not the base case. The base case is still for a very strong multiyear growth path, and the fact that customers want to spend even more than that does not somehow frame downside.

Further, we expect to see the LLM developer race to move away from the recent

winner-take-all narrative. AI applications are, by all accounts, a massive new greenfield opportunity, and much like we have seen in AI semis over the last 24 months, there are periods where perceived relative losers emerge, only for laggards to quickly catch up as demand outpaces supply. The LLM race appears similar today. Anthropic is seeing undeniable success in the enterprise, but we would highlight the fact that OpenAI has seen their run rate revenue figure grow ~3.6x, year over year exiting 2025. OpenAI has also said that their consumer enterprise mix has gone from something like 70/30 to 60/40 over that period ([here](#)), implying ~5x growth in revenue to ~\$8bn run rate i.e not all that different from Anthropic's \$9bn total run rate revenue. We can't predict software outcomes, but we expect to see many winners, and we expect NVIDIA to be the key enabler no matter who wins.

Exhibit 2: OpenAI and Anthropic run rate revenues; both are showing exceptional growth including enterprise.

Source: Media reports, company data, EpochAI, Morgan Stanley

1A) NVIDIA's role in that financing is also raising questions, as it's just a reality that NVIDIA is investing substantially into customers and development partners. Investments into Open AI, Anthropic, Coreweave, and others have raised questions, but there are also investments in partners such as Intel, as well as design software companies and communications infrastructure companies.

We think NVIDIA CEO Jensen Huang's comments about Anthropic at CES were very telling: "If I could have rewound time, I would have made some different choices with Anthropic because in the beginning they really wanted to work with us, but they also needed funding. And at the time, we just didn't have the resources to make funding to another startup at the scale that they needed. But there were two other companies that did. They were already quite large. Amazon and Google were already quite large, and so they were very supportive of Anthropic in the beginning, and we couldn't afford it." That led to Anthropic's path being ASIC heavy in the earlier days.

Those investments are clearly now part of the strategy they will continue, but we don't see it as particularly circular if NVIDIA is investing at the current public or private market price; either those companies will have the equity value to support their investments, or they won't. In particular, the company has pointed out that Open AI's 10 GW partnership with NVIDIA is "aspirational", with no binding

commitment, but they are an indication of Open AI's intentions.

Credit or leasing arrangements, on the other hand, could create a bit more anxiety. But it's important to note that the company has no leasing arrangements currently, and only a relatively small credit arrangement with the initial investment in Coreweave that was well disclosed. This week's investment into Coreweave is equity only, with no credit aspect.

That said, the company does seem open to potential credit exposure over time, citing potential for other (probably smaller) neo cloud accelerants, and other arrangements that "could be considered leases"; however 1) we do not expect full "vendor financing" where payment terms are extended longer term, 2) we expect complete transparency as to those exposures, and 3) relatively small scale, and/or credit arrangements where the credit risk is transferred to other parties.

Maybe it's just a semantic point, but we do not see this as a cynical attempt to drive revenue growth; it's a management view that NVIDIA revenues are heading to a trillion dollars by the end of the decade, which will create value through the ecosystem, and NVIDIA wants to participate in that value creation and ensure that they continue to play a dominant role within that ecosystem.

Nonetheless, we do think that the company's potential willingness to finance is an overhang for the stock.

2. Questions about competitiveness vs. ASICs and AMD - but answers come very soon in the form of Vera Rubin.

It can be hard to answer competitive questions when several processor companies in our AI coverage (NVDA, AVGO, AMD) seem likely to maintain 75%+ growth this year, capacity constrained. Everyone projects that they are gaining share, and when you are growing 75%, it probably feels that way to all concerned.

Total cost of ownership studies seem to provide various views that alternative solutions are cheaper, but our belief generally is that assessing total cost of ownership based on vendor provided specifications is a vast oversimplification; everyone that we talk to in the AI ecosystem says that the reality is much more complex, even that "we don't really know what the cost of ownership is until we deploy at scale". Benchmarks such as MLperf get much closer to the mark, and NVIDIA has generally been dominant, but those benchmarks typically come out well after deployment, and companies that don't benchmark as well don't submit, so it's incomplete at best.

Which is a long winded way of saying that it's complicated. But NVIDIA gained share in CY25, which we thought they would, and will likely be very close to holding 85% revenue share this year. The aggressive spending plans that customers maintain with NVIDIA are a clear testament to the true cost of ownership - NVIDIA's sequential incremental revenue each quarter this year will be bigger than the second biggest company's total revenue. Customers are clearly pushing to have alternatives, and we have been surprised to some degree the extent to which frontier model developers want to buy compute in every form.

So it can be hard to validate the strength of the company's position - but Vera Rubin

will certainly point in that direction. Our recent checks have indicated that this could be a more rapid transition from Blackwell to Rubin than our original projections. Comments at CES on the manufacturability of the Vera Rubin system (board assembly time of ~5 minutes versus ~2 hours for Blackwell) give us increased confidence in a smooth ramp into 2026.

As AI workloads evolve at breakneck pace, Nvidia has consistently led with the innovations developers need to maximize performance: full rack-scale connectivity at leading speeds, FP4 precision, prefill and decode disaggregation in silicon with Rubin CPX. We simply do not see all of those elements coming together in any ASIC or merchant competitor this year, and our checks point to far more enthusiasm for Rubin than for the competition.

3) As AI pushes the semiconductor ecosystem to its limits, it's a more target rich environment for investors. While at points in the last 3 years there has been enthusiasm for memory or foundry or cap equipment, the benefits have been limited. But our view - as stated in our outlook, and our rationale for moving Top Pick from NVIDIA to Sandisk then to Micron - is that 2026 is different, as the ecosystem is up against production limitations, so continued growth in AI is going to have MUCH broader coat-tails. There are many stocks to buy that benefit from the strong AI build, and many of them - especially on the commodity side - have more leverage.

That said, if NVIDIA's growth slows, none of those stocks work, and at some point we would expect NVIDIA stock to catch up to that broader ecosystem.

What would we be doing with the stock?

We continue to have high conviction in our OW rating, and NVIDIA remains our favorite of the AI processor stocks (though we are also OW AVGO and see strong near-term fundamentals for AMD and MRVL as well). The stock now trades at a lower P/E multiple than most of the other growth or cyclical names in our coverage, and while some of this is understandable given NVIDIA's limited leverage, our checks are as strong as they have been this cycle, and we have high conviction that all of our AI processor companies will continue to grow at very high rates. Unlocking this value will come with visibility over time, as positive near term earnings seems to be understood; but GTC in mid March does loom as a significant potential catalyst as we get more insight into what the Vera Rubin and other aspects of the pipeline can bring. We do need a robust capital market around AI spending - which we anticipate - and strong transparency around any credit agreements - which we also anticipate.

Risk Reward – NVIDIA Corp. (NVDA.O)

OW as large language model enthusiasm is transforming cloud capex

PRICE TARGET \$250.00

~26x our MW CY27 EPS estimate of \$9.57, a discount to large cap AI peer AVGO, and a premium to semis overall. Reflecting our higher conviction in upward revisions to estimates, and premium margin/ growth profile within the space

Consensus Price Target Distribution

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 28 Jan 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

- Blackwell remains the premiere solution for gen-AI workloads, where compute demand continues to outstrip supply
- We see continued upward pressure to estimates as demand strength continues, with Rubin expected to maintain Nvidia's performance leadership position

Consensus Rating Distribution

Risk Reward Themes

New Data Era: *Positive*
Pricing Power: *Positive*
Secular Growth: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE

\$330.00

~30x bull case MW CY27 EPS of \$11

Bull case has DC revenues continuing to grow through 2027. Upside from networking, GB300 based systems, networking, and software create potential for a full stack AI computing company worthy of an even greater valuation premium

- Higher margin data center and AI-focused software and services growth accelerates
- GPU based AI PC gains traction, widely increasing the client TAM
- Automotive opportunity takes off, allowing the company to earn recurring, per-car licensing revenue

BASE CASE

\$250.00

~26x our MW CY27 EPS of \$9.57

~26x valuation is a premium to the semis group, but a discount to large cap AI peer AVGO, reflecting the expansion in all AI names as well as our higher conviction in estimates given NVIDIA's higher AI exposure. We believe that NVIDIA should trade at a premium given its higher probability of upward revisions in the near term.

- Revenue grows by 63.4% in 2025 and 54.7% in 2026
- Datacenter continues to grow significantly in 2026 as supply remains constrained

BEAR CASE

\$150.00

~20x bear case MW CY26 EPS of \$8.25

Two key debates both go the wrong direction, causing investors to question future prospects for growth

- Growth in DC slows substantially as supply catches up to demand faster than anticipated
- AI development costs come down materially, a strong competitor enters the market to take market share, or customers begin insourcing custom hardware solutions
- Greater than expected impact from tariff headwinds and export controls

Valuation Methodology and Risks

Advanced Micro Devices (AMD.O)

Our \$260 PT for AMD equals ~30x base case FY2027e MWEPS of \$8.60, reflecting further share gains at the expense of Intel, and 42% y/y growth in datacenter (~80% in AI)

Risks to Upside

- Datacenter GPU outperforms expectations, closing the gap with Nvidia
- PC and Zen server share gain accelerates; Intel's competitive response is less impressive than expected
- Server refresh drives datacenter revenue above expectations

Risks to Downside

- Intel's server CPUs in 2025 and 2026 stifle AMD's momentum and allow it to regain share
- AMD loses graphics share to NVIDIA
- Datacenter GPU underperforms expectations

Broadcom Inc. (AVGO.O)

We value AVGO at 35X CY2027e ModelWare EPS of \$13.19. This is roughly 31x non-GAAP EPS of \$15.01, and reflects a premium over AI peers that accounts for their outsized AI growth potential and long-term prospects in ASICs.

Risks to Upside

- Stronger AI revenues
- Faster recovery in core semis businesses
- Realized VMware synergies

Risks to Downside

- Lose networking share to Nvidia (Mellanox)
- ASIC chips are uncompetitive; lose customers to competitors
- Execution on VMware acquisition

Marvell Technology Group Ltd (MRVL.O)

31X CY27e Base Case MW EPS \$3.63, in-line with high growth AI semis

Risks to Upside

- AI opportunities (Inphi optical businesses) realize earlier than expected
- Cloud custom silicon projects are larger than expected
- The storage market recovers

Risks to Downside

- AI opportunities are smaller than expected
- The strength we estimate for Storage and Networking surprise to the downside
- Enterprise DC and Networking continue to weigh on results

Micron Technology Inc. (MU.O)

25x through-cycle earnings of US \$14.00, a premium to history reflecting new opportunities in AI, At the high end of broader semis.

Risks to Upside

- Customers continue to demonstrate an appetite to take on inventory around macroeconomic uncertainty
- Additional wafer intensity of HBM further improves overall supply and demand
- Micron's HBM share surpasses expectations

Risks to Downside

- Pricing can turn quickly; a falter in end demand with inventories elevated could lead to a swift price reduction
- HBM demand falters and competition intensifies, pressuring pricing

Important Regulatory Disclosures on Subject Companies

As of December 31, 2025, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc, Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Advanced Micro Devices, Analog Devices Inc., Broadcom Inc., Intel Corporation, Micron Technology Inc., NXP Semiconductor NV, Qualcomm Inc., Semtech Corp., Texas Instruments.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Intel Corporation, IonQ Inc, Micron Technology Inc., NXP Semiconductor NV, Qualcomm Inc., Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, Silicon Laboratories Inc..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of December 31, 2025)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1519	41%	415	48%	27%	674	42%
Equal-weight/Hold	1583	43%	362	42%	23%	720	45%
Not-Rated/Hold	4	0%	1	0%	25%	1	0%
Underweight/Sell	564	15%	87	10%	15%	216	13%
Total	3,670		865			1611	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below. Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the NVIDIA Corp. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.
